

# DRAGAN MATIĆ

## CONTACT

**Address:** Boška Jugovića 13 Senta Serbia 24400

**Phone:** +381 60 5101232

**Email:** dragan@draganmatic.com

**Web:** [https://blog.draganmatic.com/init/default/show\\_page/4](https://blog.draganmatic.com/init/default/show_page/4)

**LinkedIn:** <https://www.linkedin.com/in/dragan-matic-7963231/>

## WEBSITES, PORTFOLIOS, PROFILES

- <https://sshreach.me/>
- <https://gabngabn.com/init/default/about>

## SKILLS

### Developer skills:

- Python, C#, C/C++, JavaScript, SQL, HTML/CSS, Bash, gdscrip (godot engine), PHP, Lua, Visual Basic, COBOL
- Technologies and libraries:**
- PostgreSQL, MsSql, mercurial, git, pgbouncer, nginx, samba, web2py, django, .net, websockets, WinForms, ssh, samba, postfix, jquery, redmine, puppet,
- Installation and administration of database servers and comprehensive database understanding - Microsoft SQL server and PostgreSQL, pgbouncer, high availability PostgreSQL server with streaming replication, fine tuning PostgreSQL servers...
- Skilled in installing and administration of Linux servers (Apache, nginx, Samba, DHCP, PostgreSQL, MySql, mail servers, vpn, routing and firewalls, rsync...)
- Excellent knowledge of OO programming and very good knowledge of OO design and Design patterns
- Source control software (GIT, Mercurial Subversion)

## PROFESSIONAL SUMMARY

Forward-thinking professional offering more than 20 years of experience and versed in multiple programming languages, frameworks and development tools. Background in product development, project coordination and client communications.

## WORK HISTORY

### Lead Developer, 05/2016 to Current self employed

- Created <https://sshreach.me>, internet service that allows system administrators and IT professionals to create remote-controlled secure tunnels to remote computers. sshreach.me today serves more than 100 satisfied customers.
- Designed and built scalable APIs for sshreach.me to increase customer's development workflow.
- Handled requests with friendly, knowledgeable service and support, continually achieving positive customer feedback.
- Created <https://gabngabn.com>, multilingual, social, shareable personal recipe vault.

### developer, network administrator, CTO, 09/1999 to 06/2016 Panon - Senta

- I was working in small team (6 programmers) developing for desktop and web - a modular back office software
  - Application was being developed in C#, C++, PHP and connected with legacy COBOL systems, with usage of MS SQL server and PostgreSQL databases
- Some of my tasks were:
- Developed drivers for several types of fiscal printers
  - Wrote 'upgrade wizard', application whose task is to connect to company's server and deliver upgrades to clients
  - Wrote command language parser and interpreter which was used during automated upgrade procedures
  - Developed applications for mobile and embedded system (windows CE) for use in warehouses
  - Developed install wizard for our product
  - Connected new .net modules to existing legacy application
  - Installation and administration of all self-hosted productivity tools (source control, mattermost, mail server, apache, nginx, issue tracker)
  - Installation and administration of SQL databases and optimizing queries and indexes

Besides development I was also administering local network and local database and file servers in network consisting of Windows, Linux and (active until 2004) Novell Netware servers connected through both TCP/IP and IPX/NETX protocols. I was also in charge of setting up Linux-based internet server (web, mail) and network security.

During the years my role slowly shifted from developer/sysadmin to CTO because of my knowledge of different technologies and understanding

- Web backend and frontend, and desktop software development, .net software expertise, Cloud computing
- Project Management

## ADDITIONAL INFORMATION

- date of birth: 1975. April 13.

## LANGUAGES

### Serbian:

Native

### Hungarian:

Native

### German:

Elementary

### Swedish:

Elementary

### English:

Fluent

how they all fit together. I was responsible for introducing new technologies and methods to my colleagues.

## EDUCATION

**Some College (No Degree):** Computer Sciences, 1994 – 1999  
**University of Novi Sad** - Novi Sad, Serbia

## HOBBIES, INTERESTS

- I have taken part in several open-source projects, mostly localization/translation efforts. I am also a member of local Linux User Group community.
- My non-professional experiences include work on a few smaller video games that were developed in godot.
- Whenever possible I try to attend seminars and conferences and I try to constantly improve my knowledge in the technologies I am interested in.

## TL; DR:

I have been involved with computers since my earliest age - my first experience in programming was using BASIC on Commodore 64 some 30 years ago. Since then I've had experience with a lot of different computer languages and technologies, some of them in no particular order: BASIC, C, C++, COBOL, C#, bash,, python, rust, Linux, Django,MsSql Server, PostgreSQL, Bootstrap, Web2py, Nginx, Apache, PHP, jQuery, ssh, and I'm sure I've left out a lot of them.

I've been working professionally as a developer since 1999.

I'm free/open software enthusiast and a great fan of GNU/Linux based systems.
